

Control of the media, be it broadcast or written, by too few of the rich and powerful signals a weakening of public's access and information. It seems to have all the leanings of a dictatorship; i.e. we would only be allowed to hear what those "in control" want us to hear and know. This is not democratic. This is not free enterprise. All citizens have a right of free speech under the constitution.

This Docket -02-277, will severely curtail the variety of opinion, and fact that only prevails when MANY voices are allowed to be heard.

I strongly oppose this docket and ANY additional eroding of our freedoms so that the FEW, because they can afford to 'buy' their power, can hold sway and control over the MANY.

Thank you for the opportunity to voice my opinion.
